**COARSE & FINE SEED DISC
FILTER MANUFACTURE**

to the design of:

- BOKELA
- POSEDON

CURRENT END USERS:

- ALCAN GOVE
- ALCOA AUSTRALIA
- WORSLEY ALUMINA
- GUINEA
- BMA (Saraji)
- NALCO (India)

SUPPLY OF SPARE PARTS

for all makes:

- DISC SECTORS
- BEARING HOUSINGS
- BARRELS
- GEARBOXES
- CONTROL HEADS
- AGITATORS

SITE INSTALLATION & SERVICE

WELDING/FABRICATION

Close supervision ensures accuracy of the fabrication. Weld procedures and welding processes are managed by our experienced team.

INLINE TESTING

NDT testing of welds, dimensional inspections and leak tests carried out at various stages during the manufacturing process.

SURFACE TREATMENT

Strict adherence to sand blasting and painting procedures to ensure surface treatment will withstand the onsite environment

MACHINING

All machining is able to be carried out in-house using a variety of conventional and modern NC machines.

INSPECTION

All components are inspected during and after the manufacturing process. Critical components are jig tested for compliance

PRESSURE PARTS

Manufacture of all pressure parts is to the specified Australian Standard and relevant welding codes.

ASSEMBLY

All filters are assembled and dry run. Bearing clearances, axial and radial run outs along with disc sector clearances are checked as part of this process.

FACILITIES

We are fortunate to have a number of large assembly bays where this type of work can be carried out. This allows more than 1 unit to be worked on at a time.

PACKING

The filter components are packed for transportation either on flat racks, containers or directly onto prime movers. All machined surfaces are protected and a heavy emphasis is placed on securing the items for sea freight.
